

At a Glance

Company: Aspire Sports Ltd
Location: West Midlands
Business: Sports & Physical Activity
Employees: 30

Problems

- Working from multiple locations
- Maintaining a secure file storage solution
- Desire to offer flexible working for staff
- Poor internal network

Solutions

- '[Cloud Storage](#)' for files
- iPhone Integration
- Online Management of Data

Benefits

- Access to all company data 'anywhere'
- Off-site backup of company data
- Distribution of information to staff in remote locations via iPhone
- Resilience with 'undo' and 'undo' options for lost files

The Company

Aspire Sports, Health & Fitness is recognised as a leading sports and physical activity provider in the Midlands. Their vision is to help bring about a change in our country's attitude and participation trends towards sport and physical activity in schools and local communities.

They deliver an enjoyable, well-structured, inclusive educational approach based on specific expert sports and physical activity coaching to the highest educational standards.

The Problem

Aspire Sports were using a file storage system, setup some time ago, on an internal network. The system was not meeting the needs of the business in a number of areas and was beginning to suffer from periods of failure, leading to unproductive staff.

There had also been a need recently to provide access to data for staff while 'in the field' or working from home and a solution was required which provided secure storage, but in multiple locations.

The Solution

Abussi implemented a DropBox solution which provides a '[cloud storage](#)' location of around 350Gb. This location was linked to all internal users, along with Directors on laptops so access to business data would be available while working from home.

Additionally the service was added as an application to the Directors iPhones which allows them to browse, review and email links to documents while out of the main office.

The solution allows for key staff to undelete or restore previous versions of files in case of accidental deletion and to monitor staff use of the file system, seeing which files are open and when they were last updated

"..The new DropBox service has given us the ability to be much more flexible in our approach to work, while at the same time offering secure backup of our important information.

The service is so easy to use and many staff have not noticed any difference..... its seamless.."

Paul Griffiths, Director, Aspire Sports, Health and Fitness

Abussi Ltd provides business owners with a level of IT support usually reserved for larger companies with full time IT staff. However, Abussi provides this as an outsourced service without high level of investment. Instead of employing an expensive in-house IT department, Abussi clients gain unlimited support from a staff of qualified experts.

Our solutions will save you money, decrease downtime and allow you to focus on what matters most – your business.
