- Exchange Email In House
- IT Managed Services & Helpdesk

## Benefits

- Increased reliability
- Central backup of vital data
- Integration of email to mobile devices such as iPhone
- Simplification of IT platform and ongoing support via Helpdesk

## The Company

Chamberlain Wealth Management is an independent fee-based Wealth Management practice, operating on an advisory rather than discretionary management basis.

Chamberlain's commitment to its clients does not end with an investment recommendation and they continually monitor the progress of a portfolio and services extend to a range of key issues, such as Asset allocation, Investment risk management & Investment strategy.

## The Problem

A selection of IT hardware had been installed to the business over some years but all were of an age where replacement was being considered. Moreover, the email system used was an out of date POP3 system meaning that messages were not flowing within the business effectively and any external devices such as iPhones could not integrate with the onsite IT

No central server was in place to hold vital business data and user information was held on a 'per PC' basis.

## The Solution

Abussi supplied an all new hardware platform with 5 new HP Desktop PC's and a new HP server running Microsoft [Small Business Server](#). Data was migrated from each PC to the main server and the email system was upgraded from POP3 to Exchange, a more efficient and business grade solution

Additionally, a new internet router was installed to provide enhanced security, a new network switch was installed to aid reliability and the domain name hosting was shifted to a more reliable provider. Finally, new SPAM filtering was introduced to reduce the security risks from unsolicited messages

"..Abussi understood where we were as a business and how our existing systems were no longer reliable. They put forward a sensible solution that was implemented smoothly and with limited impact on our operations, but most importantly they did all of this using simple language and explained each step as required.

This provided much reassurance in a field where we have limited understanding.."

**Robert Pryjmachuk, CEO, Chamberlain Wealth Management**

**Abussi Ltd provides business owners with a level of IT support usually reserved for larger companies with full time IT staff. However, Abussi provides this as an outsourced service without high level of investment. Instead of employing an expensive in-house IT department, Abussi clients gain unlimited support from a staff of qualified experts.**

**Our solutions will save you money, decrease downtime and allow you to focus on what matters most – your business.**
